BAUER

TITANIUM REINFORCEMENT

Titanium mesh reinforcement in the chin and forehead provides lightweight protection in critical impact zones.

GEL FOAMS

Soft gel foams provide maximum comfort.

MECHANICALLY ATTACHED LINER

The mask's outer hardware secures the foam to the inside of the shell providing an accurate fit and improved comfort.

3 FIT SYSTEM

3 sizes based on face shape, rather than traditional hat sizing, allows for a precise fit.

Goal Mask Sizing

It is recommended that all goaltenders wear CSA and HECC certified masks. All CSA and HECC certified masks have a sticker indicating their certification.

When fitting a BAUER goaltender mask, adjust the unit so that the upper perimeter of the frontal component is 1/4 inch above the eyebrow. For a proper fit, make sure all straps are fastened so that the chin cup fits snugly against the chin.

Fitting Guides/Custom Program

BAUER FITTING GUIDE

Goaltending Equipment — The Fit

Goaltending is a unique and challenging position, the most important position on the ice. Each goaltender has special needs because of the way they react or play different situations. In order to play at the top of your game, you must have confidence in your equipment to perform and protect. Equipment confidence is a state of mind, which greatly affects a goaltender's movements.

A goaltender without equipment confidence feels unsafe and hesitates before making a move. Aside from selecting the right model of equipment for the level of play, the fit of the equipment is paramount. Purchasing equipment too large or too small will only limit the product's ability to perform and protect. Equipment that does not fit properly will never break in properly.

Care And Maintenance

Once you have selected the proper fitting model of equipment that enhances your style and is suitable to your level of play, you should ensure proper care and maintenance. Drying your equipment after each use prevents mildew and excessive and premature wear. No product should be used if damaged. Any cuts or tears should be mended right away. Old or worn equipment should be replaced to ensure maximum performance and protection. Finally, do not treat the synthetic materials with silicone or other water repellents.

When buying your goal equipment, keep these points in mind. Although properly fitted equipment cannot make a goalie, it can help goalies reach their full potential.

GOAL PAD FITTING GUIDE

The key factor here is the overall length. The length can be divided into three sections:

A) The boot, B) instep to the knee, and C) knee to top or thigh rise. The proper length of the goal pad boot is determined by the goalie's skate size. The next key area is the instep to knee that determines the shin length. Finally, the knee to top or thigh rise is a personal measurement depending on how much pant and pad overlap the goaltender prefers. A general rule is 7" to 8".

Custom Pad Sizing

- A. Instep to knee: measure from instep to the front center of kneecap while leg is in slightly bent position.
- B. Thigh rise: measure from front center of kneecap up the thigh to desired height.
- C. Skate size: provide the skate size for proper boot fit.

A + B + C = estimated size of pad

If fitted properly, the goalie's knee should rest directly behind the center knee roll with the pad securely attached to the goal skate and properly strapped on the goaltender's leg. Generally, this will ensure that the pad breaks (bends) at the knee/shin and ankle as designed for optimal performance.

Consumers are advised to bring their skates and goal pants when going to purchase pads. This will provide for a true fit, as you do not play the game in street shoes, while replicating the actual feel of the pads. Therefore, there are no surprises when the goaltender goes on the ice for the first time.

Note: There may be slight differences between manufacturer's sizing.

CATCH GLOVE FITTING GUIDE

Although the trend at all levels is toward oversized gloves, the goalie's fingers should extend out to the end of the finger stalls of the inside palm to ensure a proper fit. However, any more than 1/4" from the tip of the goaltender's finger to the end of the finger stalls and the goaltender will not have the leverage needed to properly close and control the glove (pocket).

Aside from the lack of control, the glove will also have a tendency to "break back" or fold, which will make the glove difficult to use. The second key factor is that the heel of your hand should line up with the heel and cuff of the catcher. If not, the proper balance between the cuff and catching portion of the glove may be disturbed, making the glove too cumbersome while sacrificing protection.

BLOCKER FITTING GUIDE

The blocker should be fitted based on the hand size. The goalie's fingers should be no more than 1/4" from the end of the fingers in the palm. If the fingers are too long, chances are the hand tabs that tie down to the blocker are too large. This will cause the blocker to wobble, tilt, or rotate on the goaltender's hand, seriously affecting control while limiting coverage (blocking surface).

SUPREME ONE100 PRO GOAL

PERFECT BUTTERFLY

When you want maximum coverage, you use the butterfly. When you want to perfect the butterfly, you use the new SUPREME ONE100 series. Lightweight and comfortable, it's the first SUPREME series to offer our Regulated Flex construction for a custom fit and performance. Combined with new vibrant graphics, the SUPREME 100 series will help spread your wings.

JUNIOR	L	28" - 30" / 71 cm - 76 cm
	M	26" - 28" / 66 cm - 71 cm
	S	24" - 26" / 61 cm - 66 cm
YOUTH	L / XL	22" - 24" / 56 cm - 61 cm
	S / M	20" - 22" / 51 cm - 56 cm

Fitting Guide: When fitted properly, goal pants should provide unrestricted movement in the crouch position, but should not be so loose that they rotate excessively around the waist. Loosely fitting pants provide superior net coverage in addition to making the goalie look bigger. Goal pants should provide overlapping coverage with the bottom of the chest pad and the tops of the goal pads.

SUPREME ONE100 PRO GOAL SKATE

CRITICAL ANGLE OF ATTACK

When our pro goalies started asking for a skate that wouldn't slip in a wide stance or during lateral pushes, we started asking what if? What if we cut a hole in the cowling where goalies bottom out and lose their footing? Turns out it not only worked, but no one had ever done it before. Say hello to the SUPREME ONE100, a revolutionary new goal skate with a 28% increase in attack angle. What if, indeed.

LIFESTYLE APPAREL

GOAL MASKS

GOAL PROTECTIVE

BAUER BASE LAYER

TEAM APPAREL

VERTEXX COWLING

Cutting a hole in the medial forefoot of the cowling results in a 28% improved attack angle and the lightest goal skate on the market. A composite patch covers the hole for pro protection.

ATTACK ANGLE

28% Increased angle from standard goal cowling.

28%

BOOT COMFORT

Goalenders spend most of the game on their feet, so comfort is key. Extra padding in the footbed, a longer and thicker tongue and flexible ankle collar make the SUPREME ONE100 the most comfortable skate we've ever designed.

REMOVABLE RUNNER

3mm super-strong stainless steel blade that removes with a turn of the screw.

SUPREME ONE100 Pro Goal Skate

Senior [1033576] 6-12.5, full and half; D, EE widths

Junior [1033580] 1-5.5, full and half; D, EE widths

Design Features

- New VERTEXX cowling increases attack angle and reduces weight
- Thermo-formable boot
- Extended 52 oz. tongue
- Comfort foam in footbed
- Flex heel tendon collar
- Vent Ports for airflow
- 3 mm removable stainless steel runner

SUPREME ONE80 Goal Skate

Senior [1033616] 6-12.5, full and half; D, EE widths

Junior [1033620] 1-5.5, full and half; D, EE widths

Design Features

- New VERTEXX cowling reduces weight and increases attack angle
- Thermo-formable boot
- Extended 48 oz. tongue
- Comfort foam in footbed
- Flex heel tendon collar
- Vent Ports for airflow
- 4 mm removable stainless steel runner

VAPOR X:60 PRO GOAL STICK

ULTIMATE FEEL.
MAXIMUM CONTROL.
PERFECT FIT.

The VAPOR X:60 Pro Goal Stick combines the feel of traditional foam core sticks with the durability and performance that only composite sticks can provide. Offered in 3 different patterns and 3 different paddle heights, the VAPOR X:60 delivers a personalized fit and feel.

ASYMMETRIC TAPERED DESIGN

Asymmetric tapered design keeps the paddle surface square to the shooter to maximize blocking surface. The thin geometry minimizes the paddle volume, thus decreasing weight and improving balance.

**TACTILE GRIP**

The tactile grip on the shoulder provides better control during saves while the added grip on the back of the shaft provides added control when handling the puck.

**AEROSPACE FOAM**

Reinforced aerospace foam core design provides increased durability while reducing weight, improving balance and providing maximum vibration control.

**MICRO FEEL II SHAFT**

Rounded corners and double concave walls allow the shaft to fit comfortably in your hand resulting in superior control and easier puck handling.

VAPOR X:60 Composite Goal Stick

WARNING: Goal jocks are designed to minimize the risk of injury. No athletic cup can eliminate all potential injuries.

Neck protectors are recommended to minimize the possibility of injury resulting from skate cuts or other superficial blows. Neck protectors cannot protect against all potential injuries. Collar style protectors provide coverage at critical areas. Use a bib-type style to extend protective area down to the upper chest, from shoulder to shoulder. Turtleneck neck protectors feature a cut-resistant bib extension, which overlaps the shoulder pads for full coverage.
