TITANIUM REINFORCEMENT

Titanium mesh reinforcement in the chin and forehead provides lightweight protection in critical impact zones.

GEL FOAMS

Soft gel foams provide maximum comfort.

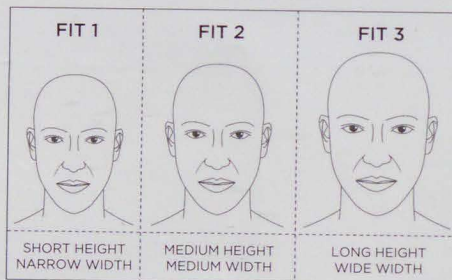

MECHANICALLY ATTACHED LINER

The mask's outer hardware secures the foam to the inside of the shell providing an accurate fit and improved comfort.

3 FIT SYSTEM

3 sizes based on face shape, rather than traditional hat sizing, allows for a precise fit.

*Products carrying a Non-Certified designation do not meet the certification requirements of CSA and HECC. Not for sale in Canada.

Goal Mask Sizing

It is recommended that all goaltenders wear CSA and HECC certified masks. All CSA and HECC certified masks have a sticker indicating their certification.

When fitting a BAUER goaltender mask, adjust the unit so that the upper perimeter of the frontal component is 1/4 inch above the eyebrow. For a proper fit, make sure all straps are fastened so that the chin cup fits snugly against the chin.

MOBILITY

MYFLEX

After 5 years of research, design, development and testing BAUER is proud to introduce patented MYFLEX technology to goalies around the world.

In 2008 we began developing a technology for goalie pads that enabled players to adjust their flex by inserting different types of foams at the pads' break points. The idea was to allow goalies to try different flex options without having to order a custom set of equipment.

SOFT

BREAK BELOW KNEE

MYFLEX

MYFLEX technology allows goalies to achieve 4 different flex options by inserting foam rods above and below the knee. Goalies can completely change their pads performance by rearranging the configuration of their foam rods. MYFLEX allows goalies to have a soft, break below the knee, break above the knee or hard construction within the same pad.

Combined with an adjustable knee cradle and adjustable strap, MYFLEX gives goaltenders the next level of customization. MYFLEX technology is offered in the SUPREME TOTALONE and SUPREME ONE90 goal pads.

Fitting Guide: When fitted properly, goal pants should provide unrestricted movement in the crouch position, but should not be so loose that they rotate excessively around the waist. Loosely fitting pants provide superior net coverage in addition to making the goalie look bigger. Goal pants should provide overlapping coverage with the bottom of the chest pad and the tops of the goal pads.

SUPREME TOTALONE

COVERAGE AND CONTROL

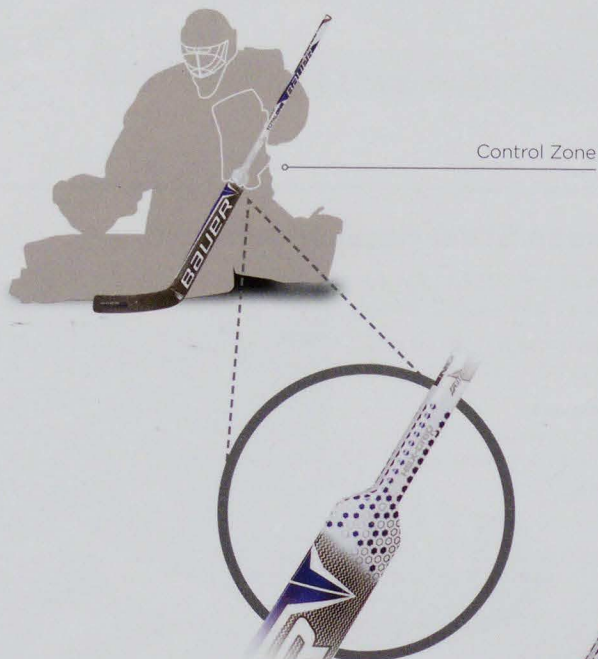

ERGONOMIC GEOMETRY

Ergonomic paddle geometry helps the stick seal closer to the body during saves. The concave paddle front increases rebound control and reduces weight.

CONTROL ZONE

Angled tactile grip on the shoulder for control during saves.

INNEGRA FIBER

Unique INNEGRA™ fiber wrap provides maximum durability with the feel of foam core.

A BETTER BLADE

Low-density foam in the blade optimizes feel and rebound control.

R10X

MOBILITY AND PLAYABILITY

CONTROL ZONE

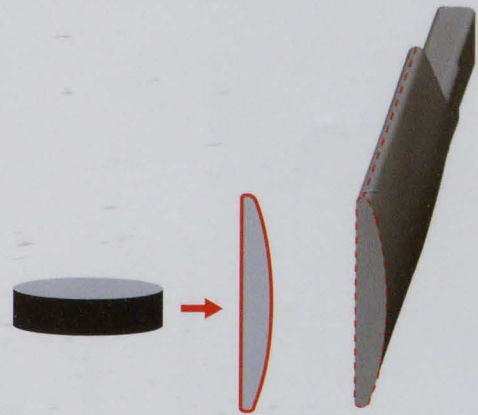

Contoured tactile grip on the shoulder for control during saves.

GRIP ZONE

Additional grip on the handle for control while playing the puck.

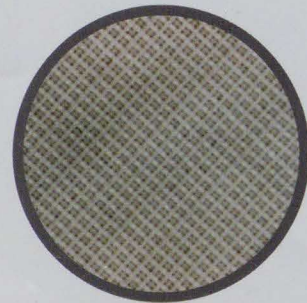

ASYMMETRIC PADDLE GEOMETRY

Flat surface for increased rebound control, lighter weight and maximum playability.

WOVEN FIBERGLASS

Maximum responsiveness and feel.

A BETTER BLADE

Low-density foam in the blade optimizes feel and rebound control.

WARNING: Goal jocks are designed to minimize the risk of injury. No athletic cup can eliminate all potential injuries. Neck protectors are recommended to minimize the possibility of injury resulting from skate cuts or other superficial blows. Neck protectors cannot protect against all potential injuries. Collar style protectors provide coverage at critical areas. Use a bib-type style to extend protective area down to the upper chest, from shoulder to shoulder. Turtleneck neck protectors feature a cut-resistant bib extension, which overlaps the shoulder pads for full coverage.
