VIBRATION DAMPENING SHELL

The NME10 has a full layer of 12k carbon weave protecting its fiberglass foundation. The INNEGRA™ fiber in the forehead and chin provides vibration dampening in the areas which are most frequently impacted.

COMFORT LINER

Multiple layers of VN foam provide impact absorption near the outer shell. PORON® foams in the NME10 deliver superior impact absorption closest to the face while soft comfort zones relieve compression around pressure points.

*Products carrying a Non-Certified designation do not meet the certification requirements of CSA and HECC. Not for sale in Canada.

VIBRATION DAMPENING TAPE

The new NME masks reduce vibration and "ringing" by adding a unique tape to the inside of the shell. The vibration dampening tape helps disperse energy traveling through the shell before it reaches the liner.

WIRE WRAP TECHNOLOGY

The new NME masks have added protection around the wire to help absorb impact and prevents damage to the shell.

*Products carrying a Non-Certified designation do not meet the certification requirements of CSA and HECC. Not for sale in Canada.

Goal Mask Sizing

It is recommended that all goaltenders wear CSA and HECC certified masks. All CSA and HECC certified masks have a sticker indicating their certification.

When fitting a BAUER goaltender mask, adjust the unit so that the upper perimeter of the frontal component is 1/4 inch above the eyebrow. For a proper fit, make sure all straps are fastened so that the chin cup fits snugly against the chin.

Fitting Guide: When fitted properly, goal pants should provide unrestricted movement in the crouch position, but should not be so loose that they rotate excessively around the waist. Loosely fitting pants provide superior net coverage in addition to making the goalie look bigger. Goal pants should provide overlapping coverage with the bottom of the chest pad and the tops of the goal pads.

SUPREME TOTALONE^{NXG}

ASYMMETRIC DESIGN

A shorter cut on the lateral side relieves pressure and allows a deeper stance, while the taller cut on the medial side maintains protection and support. The tongue also features an asymmetric shape to keep more padding at the pressure point. The asymmetric design on the new SUPREME skates specifically enhances goalies ability to move around the crease.

PORON XRD ANKLE PADDING

PORON® XRD™ foam technology provides unmatched comfort in the boot. The foam helps form around the ankle to provide comfort and increase impact protection.

GOALIE COMFORT EDGE

Designed to alleviate abrasion on the lateral side of the ankle while goalies are in their stance.
