[NEW] EXTREME FLEX 4 PADS

Building off the iconic Stanley Cup-winning goalie pad. The new Extreme Flex 4 pushes the limits of design while providing the competitive advantage of foot speed and seal to the ice.

DUALITECORE TECHNOLOGY

1

Torsional flex to maximize movement on your feet merges with a reinforced stiffer thigh rise to deliver seal and coverage to the ice.

QUICK MOTION STRAP SYSTEM

2

The perfect balance of fit and responsiveness to adapt to butterfly drops and recovery.

FLEXIBLE TOE STRING SYSTEM

3

A dynamic fit system to attach your skate to your pad, thereby optimizing connectivity and mobility.

CORE OPTIONS

Two injection molded inner core designs are offered to provide flex options from below the knee up to the thigh to maximize your five-hole coverage based on how wide or narrow your butterfly is.

SINGLE BREAK CORE

THE SINGLE BREAK CORE IS DESIGNED TO BE A SOFTER PAD WITH ONE INTERNAL BREAK BELOW THE KNEE FOR FLEXIBILITY AND MOBILITY.

DOUBLE BREAK CORE

THE DOUBLE BREAK CORE IS DESIGNED WITH 2 INTERNAL BREAKS ABOVE AND BELOW THE KNEE TO FACILITATE 5 HOLE CLOSURE.

FLEX OPTIONS

Flex options optimize internal and external flex points that can provide maximum coverage based on the width of your butterfly and desired flexibility above the knee.

KNEE STRAP OPTIONS

The best leg strap option matches the flexibility of the goal pad from the knee up. A double break core works well with straps above the knee. A stiffer single break core works well with leg straps at or below the knee.

CENTER LEG OPTIONS

INNER CHANNEL / LEG CHANNEL OPTIONS

The leg channel is a personal preference based on whether the goalie wants a loose or tight fit. A tight fit leg channel works best with a shallow ultra soft EPE core. If a loose fit leg channel is desired it is best to select a shallow soft EPE core.

PREMIER II PADS

LIGHTWEIGHT PERFORMANCE

The Premier II goal pad is re-engineered to be 20% lighter than the previous generation and built for performance to dominate the crease. A dual density core eliminates excess weight while providing improved torsional strength to maximize coverage and stability and help the pad seal to the ice. A redesigned leg channel optimizes rotation. Increasing butterfly drop velocity and recovery.

LITECORE TECHNOLOGY

20% lighter core than Premier with structural integrity to help the pad seal to the ice.

MAX REBOUND TECHNOLOGY

Directional energy transfer foam offers powerful rebound, eliminating the second shot.

QUICK MOTION STRAP SYSTEM

Responsive system for faster drop velocity and butterfly recovery.

CORE OPTIONS

Re-engineered injection molded inner core design with thinner profile to reduce weight where it matters to maximize performance. The three molded core designs are offered to provide flex options from below the knee up to the thigh to maximize your five-hole coverage based on how wide or narrow your butterfly is.

NO BREAK CORE

THE NO BREAK GOAL PAD IS DESIGNED TO BE A STIFFER GOAL PAD TO PROVIDE SOLID SEAL TO THE ICE.
*OFFERED IN PRECURVED & STRAIGHT.

INNER CHANNEL / LEG CHANNEL OPTIONS

Leg channel options provide goalies with the ability to customize their fit. A tight fit is designed to provide a secure feel of the pad centered on the leg. Goalies with less flexibility prefer a loose fit and open leg channel, which provide more room for the knee and calf to position closer to the inside edge.

PREMIER II STICK

Building on the success of the Premier Plus, the new and improved Premier II not only delivers great performance and feel, but also uncompromised durability. For the first time, it will feature Sigmatex spread-tow technology on the paddle and shaft, providing increased strength while maintaining a light weight. The design of the stick has also been taken to the next level with the use of a light-colored Sigmatex spread-tow. Lastly, the durability of the shaft has been greatly enhanced with the addition of Sigmatex as well as improved shaft compaction and overall consistency.

1 SILVER SIGMATEX SPREAD-TOW TECHNOLOGY

Improves performance due to its lighter weight while providing great strength on the paddle and shaft. The lighter design appeals to goalies while eliminating the weight added by extra paint.

2 SHAFT IMPROVEMENTS

Better consistency in shaft compaction minimizes weak points, providing greater corner strength.

3 ADDED FEEL

Dampening of vibrations due to ZeroFlux technology gives goalie better rebound control while providing great shooting and passing control.
