INTRODUCING A MAN WHO SHOULD NEED NO INTRODUCTION.

Pete Smith started building his own goalie gear when he was 16 years old. For the last 26 years, he has been refining his craft and challenging the industry norm.

Pete is not a follower. His designs have helped shape the goalie industry and can be found in many of today's products.

He was one of the pioneers of foam core box pads. He's also the mastermind behind features such as the closed toe, knee lifts, the hinged knee, angled top straps, squared-up butterfly pad shape, inner panels that allow butterfly slides, the sliding toe bridge, the bindingless boot and many others. He's made his mark and he's only getting started.

Now that Pete is overseeing goalie design at Warrior Hockey, nothing will be overlooked. 2012 will be about innovation, and the new Ritual line of equipment has a functional, versatile design that delivers optimal results in the crease.

There's a lot to be said about Pete Smith joining Warrior Hockey, but two words sum it up best...

ALL HAIL.

RITUAL PRO CUSTOM

Leg Pad

Features

- Pro-level protection and sizing in a lightweight package
- Exclusive bindingless construction allows for a lightweight pad while increasing durability by taking away the typical wear points on leg pads
- Rounded boot eliminates friction with the ice
- New "Knee Leveler" stabilizes the knee landing area providing a continuous landing surface
- Adjustable strap position offers a greater degree of strap placement customization
- Internal hinge design allows for flexibility through the knee and ankle while providing a sturdy structure to prevent pad shrinkage and settling
- Exclusive post wedge panel provides increased protection to the outer calf while helping to seal the pad to the post when standing up with knees bent
- Exclusive hinged knee design allows the outer portion of knee cradle to twist when going into a butterfly, allowing for a smooth rotation with minimal stress on your straps
- Sliding toe bridge allows the pad to be worn snug at the toe, creating a more responsive feel while allowing the full range of movement for the skate to drop to the ice during a butterfly, thus reducing stress to the goalie's ankle, knee and hip
- Squared-up design creates a complete seal across the ice when in a butterfly
- Thin thigh profile allows the tops of the pads to overlap each other when in your stance and moving on your feet, thus increasing mobility
- Exclusive "tabletop boot construction" allows the boot to sit and move on top of your skate, increasing mobility and coverage

Caractéristiques

- Niveau de protection et d'ajustement professionnel ultra-léger
- Design de charnière interne conçu pour plus de flexibilité au niveau du genou et de la cheville tout en évitant la rétraction et l'affaissement de la jambière
- Design de charnière de genou exclusif conçu pour permettre une rotation de la partie extérieure du genou en position « papillon »
- Glissière latérale au bout du patin offrant un ajustement personnalisé en facilitant un mouvement plus complet tout en réduisant le stress sur la cheville, genou et hanche
- Construction exclusive "tabletop boot construction" permet à la bottine de se déplacer facilement sur votre patin, pour une mobilité et protection améliorée
- Fabriqué au Canada

Pro Impact Management Protective System™

RITUAL

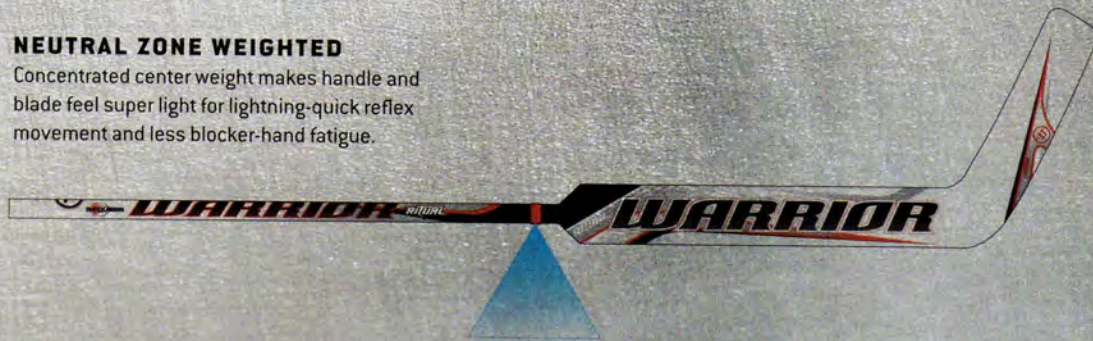

SHOCKA TECHNOLOGY

Shocka Insert Sleeve is made of a high-strength, low durometer polyurethane that both absorbs vibration and creates a lively flex point in the middle of the stick. Increased flex for shooting and vibration control. Added stability at impact improves rebound control.

NEUTRAL ZONE WEIGHTED

Concentrated center weight makes handle and blade feel super light for lightning-quick reflex movement and less blocker-hand fatigue.

TWISTER GRIP

Twister Grip raised flow pattern in top paddle area for added grip and less stick twisting on high-impact shots. Flow pattern also allows for quick release for poke checking and shooting.

STICK CONSTRUCTION TECHNOLOGY

RITUAL

SHOCKA TECHNOLOGY

Shocka Insert Sleeve is made of a high-strength, low durometer polyurethane that both absorbs vibration and creates a lively flex point in the middle of the stick. Increased flex for shooting and vibration control. Added stability at impact improves rebound control.

NEUTRAL ZONE WEIGHTED

Concentrated center weight makes handle and blade feel super light for lightning-quick reflex movement and less blocker-hand fatigue.

TWISTER GRIP

Twister Grip raised flow pattern in top paddle area for added grip and less stick twisting on high-impact shots. Flow pattern also allows for quick release for poke checking and shooting.

STICK CONSTRUCTION TECHNOLOGY

WAVE

Vibex™ is a blend of polymers and synthetic hydrocarbons in the form of a highly viscous gel block. Vibex has been shown to reduce vibration by up to 75% in laboratory testing by a major university.

VIBEX VIBRATION DAMPENER

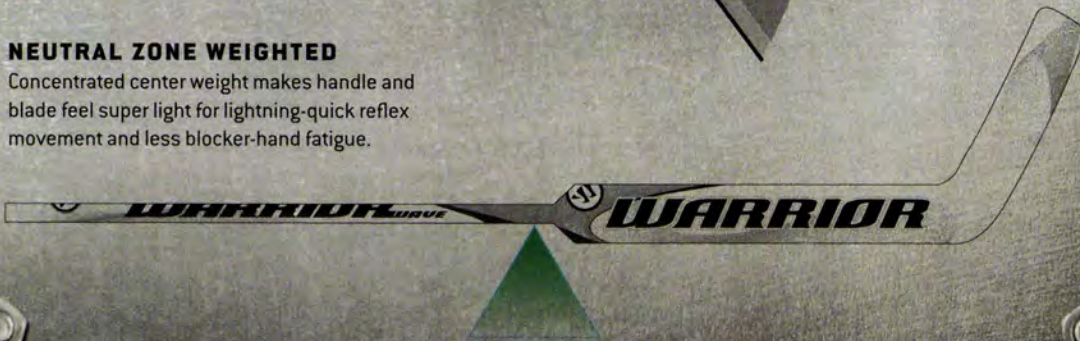

First use of this revolutionary material in the aid of vibration and shock reduction in composite goalie sticks. Less vibration leads to a more solid paddle feel and deadens puck rebound. Reduced vibration shock to the blocker hand and closer to a foam core paddle feel without the weight.

BIG BANG

Woven fiber reinforced shell for added durability in key impact areas in handle, paddle and blade. Increased impact durability and more solid feel on impact.

NEUTRAL ZONE WEIGHTED

Concentrated center weight makes handle and blade feel super light for lightning-quick reflex movement and less blocker-hand fatigue.
